Important safeguards

Read these instructions carefully before installing any parts of this system.
Save these instructions for future reference and maintenance work.

For your safety

When using electrical equipment, basic safety precautions should always be followed including the following:

- 1 Before installing Ad'Lite™ LED or doing any maintenance, make sure to turn off the LED driver and pull out the plug from wall socket
- 2 Do not use outdoors
- 3 Do not use this equipment for other than intended use or with other manufacturers equipment not provided by HL

Caution: To reduce the risk of overheating and fire do not bridge conductors

Operating temperature

Minimum is **-20°C**

Maximum is **50°C**

Caution: Only use LED drivers specified for SELV (Safety Extra Low Voltage) with short-circuit and overload protection for the Ad'Lite 24V system. The minimum required cable size for the Ad'Lite 24V system is AWG16 (or equivalent), with a cable area of 1,307mm². The maximum allowed cable length between the power adapter and PowerTrack is 2500mm.

PowerTrack™ installation

1

Mount the end-caps in both ends of the PowerTrack™. Press them in place.

2

Fix the end-caps with enclosed screws.

PowerTrack™ installation

3

Attach the PowerTrack™ to the back panel of the racking. For tape version of the PowerTrack™, remove the protection film before mounting.

PowerTrack™ may also be wall mounted horizontally

4

If more than one PowerTrack™, join them with the AWG16-PT24Ax2 cable by connecting one adapter to each PowerTrack™.

Hook the connector into position and then push it to snap on the PowerTrack™

Fasten connectors minimum **3cm** from PowerTrack™ edge

Make sure connectors are aligned with engraving

PowerTrack™ installation

5

Plug in the driver. Snap the power adapter to the PowerTrack™.

Hook the connector into position and then push it to snap on the PowerTrack™

Fasten connectors minimum **3cm** from PowerTrack™ edge

Make sure connectors are aligned with engraving

6

Plug in the wall plug.

LED fixtures installation - Metal shelves

1

Place the LED fixture at desired position, the LED fixture attaches with integrated magnets.

LED fixtures installation - Wire shelves

1

Attach the magnet clip MGTS-270 at the front of the reinforcement bar.

2

Attach the LED fixture into the magnet clips.

LED fixtures installation - Wood shelves

1

Screw MOUNTING-PLATE-WOOD-le0050 to the shelf. Align placement with the integrated magnets on the LED fixture.

2

Place the LED fixture on the plates, the LED fixture attaches with integrated magnets.

LED fixtures installation - Glass shelves

- 1** Remove the protection film of MOUNTING-PLATE-GLASS-le0050 and tape it to the shelf. Align placement with the integrated magnets on the LED fixture.

- 2** Place the LED fixture on the plates, the LED fixture attaches with integrated magnets.

LED fixtures installation - WP-LIGHT-BAR

1

Place the LED fixture into the U-channel.

2

The LED fixture attaches with integrated magnets.

LED fixtures installation - Slimline™ Ultra

1

Slide the LED fixture into SUA-PROFILE.

2

Push the tagged lip of the SUA-PROFILE into the intended pocket on the datastrip.

LED fixtures installation - CosmeLine™

1

Push the lip on the CL-OR-XS-PROFILE into the intended pocket on the datastrip.

2

Snap the LED fixture into the CL-OR-XS-PROFIL.

LED fixtures installation - Sigma Pods

1

Fasten the Sigma LED carrier bar onto the pod.

2

Add the LED24 fixture.

LED fixtures installation - Connecting individual LED fixtures

1

Connect LED fixture connector to the LED fixture, press until you hear a click.

2

Connect the track adapter on the other end of the cable to the PowerTrack™.

Hook the connector into position and then push it to snap on the PowerTrack™

Fasten connectors minimum **3cm** from PowerTrack™ edge

Make sure connectors are aligned with engraving

LED fixtures installation -

Connecting LED fixtures in series, with cable

1

Connect LED fixture connector to the first LED fixture you want to connect in series. Press until you hear a click.

2

Connect the LED fixture connector on the other end of the cable to the second LED fixture. Press until you hear a click.

LED fixtures installation - Connecting LED fixtures in series, with cable

3

Connect the LED fixture connector to the LED fixture. Press until you hear a click.

4

Connect the track adapter on the other end of the cable to the PowerTrack™.

Hook the connector into position and then push it to snap on the PowerTrack™

Fasten connectors minimum **3cm** from PowerTrack™ edge

Make sure connectors are aligned with engraving

LED fixtures installation - Connecting LED fixtures in series, end to end

1

Join male side of one LED fixture with the female side of another, press until you hear a click.

Maintenance

- / Turn off the LED driver
- / Use a dry cloth to clean the LED fixtures and the PowerTrack™

Do not use chemical or abrasive cleaners.

Disassembly instructions PowerTrack™

Before disassembling any parts make sure to:

1. Turn off the LED driver – pull out the plug from wall socket
2. Disconnect all wires between PowerTrack™ and LED fixtures as well as between LED fixtures
3. If any LED fixtures are directly connected in series, disconnect these from each other
